**PERFORMANCE**

- Cleans dirt and grime from fibers & fabrics
- Unique formulas for many cleaning situations,
- Use pH to clean for the right job
- Extremely versatile program
- Dries quickly - No soapy, slippery residue
- Fresh, natural scents
- Concentrated formulas

Full line of carpet & fiber care products for professional cleaners. Color system helps pick the right product for the job.

**HEALTH & SAFETY**

- Helps reduce allergens
- Low VOCs
- Safer alternative to harsh cleaners

## Methods and Procedures

- Precleaning inspection
- Vacuuming
- Preconditioning/Prespotting
- Soil Suspension
- Soil Extraction
- Finishing
- Drying

**Precleaning inspection:** A thorough precleaning inspection and walk through with the building owner or person responsible for the maintenance is a must. Use this time to explain the methods to be used and why they are the best situation. This will encourage the customer to have realistic expectations regarding the outcome of the job.

**Vacuuuming** - Vacuuming is critical. A majority of the particulate soils will be removed during the vacuuming process.

**Prespotting** - Problem spots should be addressed using Core's specialty spotters. Follow directions of the product selected for best results.

**Preconditioning** - This is the step where most of the soil suspension and emulsification actually takes place. Do not skip this procedure or the results will be compromised.

**Soil Suspension** - Four fundamentals of soil suspension are: chemical action, agitation, time and temperature.

**Extraction** - Process where suspended soils are removed from the fibers. Common methods: steam extraction, rotary shampoo and spin bonnet. Each methods has advantages and disadvantages.

**Finishing** - Process of grooming carpet to enhance appearance and drying. Comb the fiber so they all lay in one direction.

**Drying** - Utilize the HVAC system on location, ceiling fans, blowers, etc. Failure to properly dry the fiber will cause problems.

## USES AND APPLICATIONS

- Airports
  - Schools & Daycares
  - Restaurants & Cafeterias
  - Hotels, Office buildings
  - Synthetic and natural fibers
  - Topical cleaning
  - Deodorizes while you clean
- Use in truck mounts, portable systems and steam type machines

**SIZES: 128 ozs, 5 gal pails, 55 gal drums, 275 gal totes**
